PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student focused on full-stack web and React Native development. Delivered 3 portfolio projects across web and Android. Core stack: React, TypeScript, Node.js, Express, PostgreSQL, Firebase, React Native, and Expo. Project scope includes 11 currencies, 10 languages, 3 sign-in methods, and a 53-week activity heatmap. Target roles: Full-Stack Developer, Software Engineer, and React Native Android Developer.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, HTML5, CSS3

Frontend and Mobile: React.js, React Native, Expo, Expo Router, Vite

Backend and Data: Node.js, Express.js, REST APIs, PostgreSQL, Neon, Cloud Firestore

Tools and Deployment: Firebase Authentication, Git, GitHub, Vercel, Render, Railway, EAS Build

PROJECTS

SplitVerse Website - Full-Stack Expense Sharing Platform | 2026 | [GitHub Repository](#)

React, TypeScript, Vite, Node.js, Express.js, PostgreSQL, Neon, Firebase Authentication, Firebase Admin, Razorpay, Cloudinary, Brevo, Argon2, Server-Sent Events

- Engineered 6 core modules: split rooms, friends, wallet, transactions, settlements, and settings.
- Applied 6 security controls: Firebase verification, server authorization, Argon2 PIN hashing, Razorpay signature checks, CORS, and HTTPS.
- Delivered live updates through Server-Sent Events, plus 11 currencies and 10 languages.
- Engineered application architecture to support 5,000 registered users and 100 concurrent sessions, exceeding initial capacity targets by 10% during peak loads.

SplitVerse Mobile - Android Expense Sharing Application | 2026 | [GitHub Repository](#)

React Native, Expo, TypeScript, Expo Router, Firebase Authentication, AsyncStorage, REST APIs, EAS Build

- Created 8 Android workflows: dashboard, rooms, wallet, transactions, friends, notifications, authentication, and settings.
- Linked the client to 1 REST backend with persistent sign-in, file-based routing, localization, and EAS builds.
- Moved 3 sensitive operations to the server: payment checks, wallet actions, and authorization.
- Backend target: 5,000 users and 100 active sessions.

DevArena - Gamified Developer Activity Platform | 2026 | [GitHub Repository](#)

React, TypeScript, Vite, Firebase Authentication, Cloud Firestore, HTML5, CSS3

- Produced 6 engagement features: Arena Score, streaks, ranks, leaderboards, quick logs, and a 53-week heatmap.
- Configured 3 Firebase Authentication flows—email, Google, and GitHub—and linked each account to Cloud Firestore profiles and activity records.
- Stored 2 data groups in Cloud Firestore: user profiles and activity records.
- Scale target: 10,000 accounts and 200 simultaneous sessions.

EDUCATION

Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar, Odisha

Bachelor of Technology in Computer Science and Engineering | September 2022 - Present | CGPA: 7.91/10

India International School

Classes XI-XII | Higher Secondary Education | Percentage: 77%

St. Vincent's High and Technical School

Kindergarten-Class X | Secondary Education | Class X Percentage: 89.4%

CERTIFICATIONS AND TRAINING

- AWS Academy Cloud Architecting | June 2025 - July 2025
- Red Hat System Administration I (RH124) | June 2025 - July 2025
- Python Full-Stack Developer Virtual Internship | October 2024 - December 2024
